

LAB 2

Agile Backlog Creation & Sprint Simulation in Jira

Problem Statement 4 — Student Project Portfolio & Showcase App

Student Detail	Information
Name	Kirthana S
SRN	PES1UG24AM136
Section	C
Semester	5
Jira Project	Student Project Portfolio & Showcase App
Individual Epic	Showcase Profile Management
Sprint	Sprint 1

1. OBJECTIVE

To convert the functional requirements identified in Lab 1 into Agile backlog items in Jira, organize them into an Epic and User Stories, prioritize and estimate the stories using story points, simulate sprint execution, and analyse sprint progress using the Burndown Chart.

2. EPIC — SHOWCASE PROFILE MANAGEMENT

Field	Details
Epic Key	SCRUM-5
Epic Name	Showcase Profile Management
Assignee	Kirthana Shetty
Related Requirements	FR-001, FR-002
Priority	High
Sprint	Sprint 1

Spaces / Student Project Port... / SCRUM-5

Showcase Profile Management

+ ... =>

Description

Enable Student Teams to create showcase profiles containing project title, team details, abstract summary, demo video link, and GitHub repository URL, and validate the submitted GitHub repository URL before publication.

Child work items 100% Done

Work	Priority	Assignee	Status
SCRUM-28 Correct/Resubmit Invalid Repository URL	High	KS K...	Done
SCRUM-6 Create Showcase Profile	High	KS K...	Done
SCRUM-19 Validate GitHub Repository URL	High	KS K...	Done

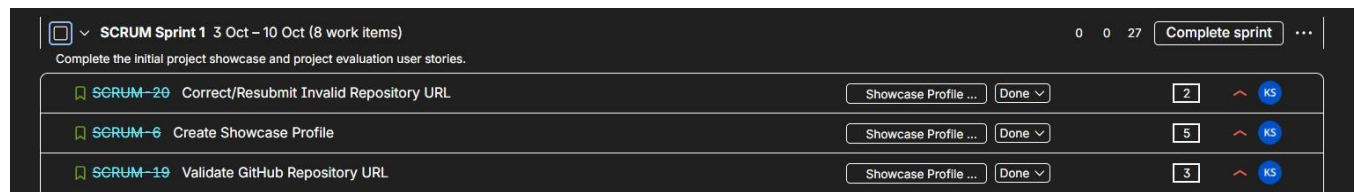

Figure 1. Jira Epic — Showcase Profile Management (SCRUM-5).

3. REQUIREMENT-TO-BACKLOG MAPPING

Lab 1 Requirement	Jira User Story	Priority	Story Points	Sprint
FR-001 — Create showcase profile	SCRUM-6 — Create Showcase Profile	High	5	Sprint 1
FR-002 — Validate GitHub repository URL	SCRUM-19 — Validate GitHub Repository URL	High	3	Sprint 1
UC-01 Alternate Flow A1 — Correct invalid URL and resubmit	SCRUM-20 — Correct/Resubmit Invalid Repository URL	High	2	Sprint 1

4. JIRA BACKLOG AND STORY POINTS

The backlog contains the three User Stories assigned to the Showcase Profile Management Epic. Story points follow the Fibonacci-based estimation approach used in the Jira lab.

The screenshot shows the Jira interface for 'SCRUM Sprint 1' (Oct 3 - Oct 10) with 8 work items. The backlog lists three user stories under the 'Showcase Profile Management' epic:

User Story	Priority	Epic Association	Story Points
SCRUM-20 Correct/Resubmit Invalid Repository URL	High	Showcase Profile ...	2
SCRUM-6 Create Showcase Profile	High	Showcase Profile ...	5
SCRUM-19 Validate GitHub Repository URL	High	Showcase Profile ...	3

Figure 2. Jira Sprint 1 Backlog showing the User Stories, priorities, Epic association, and story-point estimates.

5. USER STORIES

5.1 SCRUM-6 — Create Showcase Profile

User Story: As a Student Team, I want to create a showcase profile containing project and team information, so that my project can be presented in the project showcase.

Acceptance Criteria:

- Project title and team details can be entered.
- An abstract summary can be provided.
- A demo video link can be provided.
- A GitHub repository URL can be provided.
- Mandatory details must be present before the profile is saved.

Priority	Story Points	Sprint	Status
High	5	Sprint 1	Done

Create Showcase Profile

+ ...

Description

User story

As a Student Team, when creating a showcase profile, I want to add the project title, team details, abstract summary, demo video link, and GitHub repository URL so that I can present my project in a standardized format.

Context

The issue is to create a showcase profile for a student team. The profile should contain the required project and team information in a standard format.

Acceptance criteria

- The Student Team can enter the project title and team details.
- The Student Team can enter the abstract summary.
- The Student Team can provide a demo video link.
- The Student Team can provide a GitHub repository URL.
- Mandatory details must be entered before the profile can be saved.
- The completed profile can be saved successfully.

Figure 3. Jira User Story — SCRUM-6 Create Showcase Profile.

5.2 SCRUM-19 — Validate GitHub Repository URL

User Story: As a Student Team, I want the submitted GitHub repository URL to be validated, so that my showcase profile is not published with an invalid repository link.

Acceptance Criteria:

- A valid GitHub repository URL is accepted.
- An invalid or malformed URL is rejected.
- The profile is not published when the URL is invalid.

Priority	Story Points	Sprint	Status
High	3	Sprint 1	Done

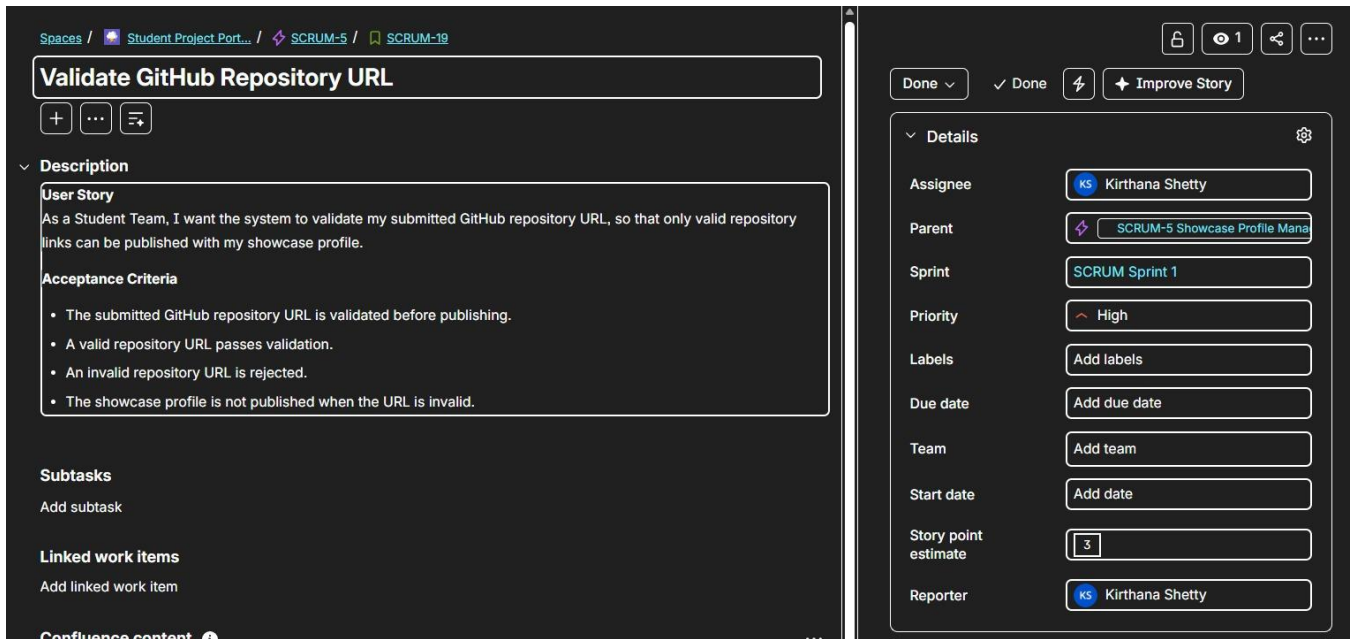

Figure 4. Jira User Story — SCRUM-19 Validate GitHub Repository URL.

5.3 SCRUM-20 — Correct/Resubmit Invalid Repository URL

User Story: As a Student Team, I want to correct and resubmit an invalid GitHub repository URL, so that my showcase profile can pass validation and be published.

Acceptance Criteria:

- An invalid URL displays an error.
- The profile is not published while the URL is invalid.
- The Student Team can correct the URL.
- The corrected URL can be resubmitted.
- The corrected URL is validated again.

Priority	Story Points	Sprint	Status

7. BURNDOWN CHART

The Sprint 1 Burndown Chart uses story points as the estimation field. The chart shows 17 story points at the start of Sprint 1 and 0 remaining story points by the end of the sprint.

Figure 7. Jira Burndown Chart for SCRUM Sprint 1.

8. REFLECTION

1. Did your estimations reflect the actual effort?

The estimates were reasonable relative to the scope of the three stories. Create Showcase Profile was assigned 5 points because it covers several project and team fields and mandatory-data checks. GitHub URL validation was assigned 3 points, while correcting and resubmitting an invalid URL was assigned 2 points as a smaller supporting flow.

2. Was your backlog well-prioritized?

Yes. The three stories supporting Showcase Profile Management were marked High priority because profile creation and GitHub repository validation are core parts of the showcase-profile workflow.

3. How did your simulated sprint align with your plan?

The three planned Showcase Profile Management stories were placed in Sprint 1 and completed through the Jira workflow. The completed-work evidence shows SCRUM-6, SCRUM-19 and SCRUM-20 in Done status.

4. What insights did the burndown chart give about your team's capacity?

The Burndown Chart shows a Sprint 1 workload of 17 story points and 0 remaining points by the end of the sprint. This indicates that the planned Sprint 1 workload was completed. The 17-point figure represents the whole team sprint.

9. CONCLUSION

Lab 2 converted the Lab 1 requirements for showcase-profile management into an Agile Jira backlog. The Showcase Profile Management Epic contained three User Stories with a combined estimate of 10 story points. The stories were prioritized, assigned to Sprint 1, and completed. The Jira backlog, individual story records, completed-work evidence, and Burndown Chart document the Agile planning and sprint execution.
